The QUALCOMM Q™ phone is not just a small phone. It's a

small phone with the most advanced digital technology around — CDMA. The Q phone gives you a lot of communications power in a very little package. It starts with the clearest digital voice quality. Plus, conversations are completely private and secure, thanks to CDMA's unique digital encoding. You'll stay in touch and in control, wherever you go. What's more, the QUALCOMM Q phone works as an alphanumeric pager. The Q phone will also give you the capability to access and display information like stock quotes, airline schedules, weather, and even e-mail.

The Q phone is made exclusively by QUALCOMM, the world's leading manufacturer of CDMA digital phones. Nobody knows CDMA like QUALCOMM, because we developed the CDMA digital technology that's now used by wireless service providers worldwide. For quality and technology leadership in digital phones, the world looks to QUALCOMM.

Get superior voice quality, private, secure communications and the versatility of phone, pager and voice mail in one tiny package.
